

WEFATHERM

PP-R Piping System

The Wefatherm PP-R System is ideally suited for use in a wide range of applications including hot and cold water systems, industrial heating and cooling, air-conditioning systems and compressed air networks. PP-R is the ideal replacement for traditional materials such as copper, steel and galvanised piping.

Benefits

- Light weight, Non-toxic, Corrosion resistant
- Low pressure loss, Reduced noise
- Low thermal conductivity
- Fusion welded joints, Simple and economical installation

Range

- Complete product range, 20mm to 160mm
- PN10, PN16, PN20, fibre pipe and stabipipe
- Made in Germany to the highest international standards
